Firing UP

Our PK U.S.A. plant is the primary supplier of metal body parts, chassis parts and plastic injection parts for automotive companies in the United States as well as other parts of the world.

“I Love My Job.” Anjie Gibson and PK U.S.A. Quality Control.

WHAT'S INSIDE

- Anjie Gibson - Her job, her family, her passion.
- PK U.S.A. Job Fair
- Safety Point Lesson

SAFETY ONE - POINT LESSON

Unsafe Condition

Do not walk under anything that is elevated (such as dies, coils, or items carried by/on forklifts). Walk around or wait until the loads have been lowered to floor level. Do not take the chance of chains or forklifts malfunctioning/breaking causing items to fall or be dropped.

Do not pass through taped off areas and walk under elevated equipment.

Wait until dies have been moved from walking areas before passing.

Be careful when forklifts are retrieving containers from areas like the WIP rows. Keep your distance until the load is secured and on the floor level.

Keep up with the company at www.pkusa.com

“Quality Control, My Job and My Responsibility”

Anjie Gibson began working at PK U.S.A. many years ago, left for another opportunity, and came back again almost two years ago, and for her, there is no looking back.

“I returned to PK U.S.A. after working in adult care for three years. I came back because I wanted a job that would allow me to use my organizational skills and apply those skills with what I do everyday. Quality Control is a perfect fit.” Although Anjie began as a sorter, she quickly moved over to Quality Control, and she currently supervises her area, keeping work flow at its maximum capacity. “Quality Control is such an important component of the overall production process at PK. Work cannot be completed without ensuring we are producing the best parts for our customers.”

Anjie’s organizational skills, along with attention to detail, translate well in the Quality Control environment. A mom to four grown children and five grandchildren, Anjie knows that keeping work-flow streamlined is key. “If I do not keep good track, good records and detailed descriptions of those parts I am checking, it will affect lines and production across the board at PK. Flexibility, that’s also key. I help where I am needed when I am needed.”

Two years into her first-shift position at PK U.S.A. has afforded Anjie the abilities to work hard while at work, and work hard helping at home with projects. While her children are grown, her position allows her to ensure she has family time. “My kids and grandkids are important to me, and working at PK affords me the opportunity to have time with them when I want to, and when they need me.”

Anjie’s co-workers also make work easier and fun. “Everyone I work with in Q.C. have the same goals and aspirations, which make the job even better and more satisfying. We are all in this together, and it is our job to make sure the customer is happy with everything we produce at PK U.S.A.”

In Q.C., Anjie works with a variety of testing equipment to ensure the parts are right each and every time.

PK U.S.A. JOB FAIR EXCEEDS EXPECTATIONS

PK U.S.A. held our annual Job Fair on February 17th. Over 40 participants took part in the job fair on a chilly Saturday morning. Fourteen job offers were presented and three rehires were brought back on board at PK. Thank you to all of our volunteers and associates who helped make the day such a success:

Doug Richardson
Johnny Smith
Karen Jackson
Erin Small
Kevin Cameruca
Jake Kortz

Josh Acton
Kim Randolph
Sandy Lacy
John McNeely
Kent McNeely
Anthony Zual

Shannon Meek
Kelsey Williams
Chad Elliott
Dan Case
David Heath
